

DERDEK

Derdek is a platform dedicated to training, research, creation and dissemination of performance in Morocco and internationally. This project seeks to connect Moroccan artists from different backgrounds and disciplines with researchers, curators, Moroccan and foreign cultural actors. It was born from the need detected among Moroccan artists to take time for reflection and collective experimentation around performance.

The cornerstone of DERDEK is an intensive and professional training which brings together Moroccan artists, international artist-performers who are also educators, and a diverse audience for one month around performance art.
